

Expected indications (research reports)

- 1) Chronic inflammation
- 2) Chronic pain.
- 3) *Rheumatism, knee and other arthritis, spinal stenosis
- 4) *Pyelonephritis and diabetes mellitus
- 5) *Chronic symptoms around neoplasms,

Safety

- 1) Radon is a chemically stable gas.
- 2) As a gas, it diffuses through ventilation.
- 3) It is easily expelled by breathing.

Usage

30~60 minutes a day is recommended.

Price

Main unit: ¥2,500,000 (excluding tax)

Transport and installation fee (ask)

: from ¥30,000

(Varies by region and installation location)

(ask intentional transport cost, also tax)

Radon Spa Therapy

Do you know about Masutomi Onsen-kyo, which is located near Mt Muzgai, Hokuto City, Yamanashi Prefecture?

Its spring water contains any kind of minerals, as well as radium and radon specifically, and has been popular as a healing hot spring since long ago. Its efficacy is known to be effective against chronic inflammation and pain, and is clearly stated in the Onsen Law. Thus, many people suffering from rheumatism and arthritis visit the Onsen for a treatment. This is a common method of use in radon spa hospitals in Germany and Austria, and has been established as an insurance-covered treatment method in a number of European countries.

Radon is one of the most observable atoms anywhere on earth. However, it is rare for a hot spring to contain the amount of radon required by the Hot Springs Act, and only a few hot springs are available with concentrations such as those offered in radon spa hospital in Europe.

Radon Capsule

Although the effects of radon hot springs are well known, their application in medicine is limited.

Therefore, we designed the Radon Capsule that provides the effect of radon therapy in an easy and simple way. The inside of the capsule is designed to reproduce the radon concentration of radon spa hospital offered in Europe. The image below shows a radon spa hospital in Salzburg, Austria. The gallery is filled with radon. In other words, it has been proven that the therapeutic effects of radon stimulation through the skin and breathing can be achieved even without bathing in a hot spring. The Radon Capsule can set up a situation similar to that of the gallery.
